

AQUENCE FB 3557

Known as: Adhesin 3557
August 2019

Description:

Trouble shooting grade Acrylic/EVA blend for paper converting applications where good adhesion and flexibility are the prime requirements – High speed packet, glue-lap, case & carton making, window/foil film to paper & board. Good adhesion to paper coatings, most films and foils.

This adhesive is gluten allergen free.

Typical Properties:

Appearance:	White
Odour:	Low when wet, dries odourless
Viscosity:	Approx. 800 cP at 23°C
Solids:	Approx. 56%
pH:	Approx. 5.0

Directions for Use:

AQUENCE FB 3557 is supplied ready to use and generally applied by direct transfer from spray, extrusion or nozzle applicators. This adhesive has excellent adhesion to difficult surfaces such as lacquered, printed and laminated boards. This adhesive features excellent machining properties. The final bond improves up to one week. The final bond has good heat and humidity resistance. Incompatible with some metals resulting in gelling. Stainless steel pipes and fittings should be used with this product.

Supplementary Products:

Previously called Adhesin 3557.

If a higher viscosity product is required Aquence FB 3558 - 3500cP at 23°C.

Clean Up:

With water whilst wet.

Storage and Handling:

Please read the Material Safety Data Sheet for this product BEFORE use.

Product should be stored between 15°C and 30°C on a wooden pallet and kept from freezing. Rotate stock using oldest material first. Keep stock covered to prevent drying out and contamination. Do not mix with other adhesives. Supplied ready for use but can be diluted with water if required.

Please ensure that products classed as a dangerous good are stored in compliance with the applicable regulations.

Shelf Life:

Best used within 6 months from date of manufacture when stored under the above conditions in the original unopened containers.

Last Updated: 26-08-2015
